① choose  $i$ , must choose  $j$

$$X_i \leq X_j$$

② we must choose both  $i$  and  $j$ ,  
or neither

$$X_i = X_j$$

③ choose at most  $t$  items  
from a set  $S$

$$\sum_{i \in S} X_i \leq t$$

④ choose any one item in a  
set  $S$ , must choose item  
 $k$  ( $k \in S$ )

$$X_j \leq X_k \quad \forall j \in S$$

⑤ Choose all items in  $S$ , must choose  $k$ .

~~$$x_k \geq \frac{1}{|S|} \sum_{j \in S} x_j$$~~

$$x_k \geq \sum_{j \in S} x_j - (|S| - 1)$$
